A Step-by-Step Process for Designing Lessons
As Part of A Blended Solution

Step 1
Purpose Of The Digital Lesson

Duration	

Targeted learners	

Performance Gap	

Pre Requisites	

Aim of Training	

Step 2
Create The Lesson Objective

Title of my Lesson module

The objective of my Lesson module

Task *(What learners will be able to do)*

| |
|---|
| |

Condition *(When will they do this in the real world?)*

Standard *(How well ie if you were watching them perform this task, how would you know it was being done the way the organisation needed them to do it?)*

Contextual Challenge/Real Life Situation (Scenario)

Step 4
My Digital Lesson

Step	Type (Preparation, Presentation, Practice, Performance)	Description (What activity will be happening)	Duration (In Minutes)	Materials
1				
2				
3				
4				
5				
6				
7				

My Webinar Module ctd

Step	Type (Preparation, Presentation, Practice, Performance)	Description (What activity will be happening)	Duration (In Minutes)	Materials
9				
10				
11				
12				
13				
14				
15				

Step 5
Lesson Format

What application will be used to create this lesson?
