A Step-by-Step Process for Designing Scenario Based eLearning That Transfers Skills and Knowledge

Step 1
Purpose Of The eLearning

Duration	
Targeted Learners	
Performance Gap	
Pre Requisites	
Aim of Training	

Step 2
Create The eLearning Objective

Title of my eLearning module

The objective of my eLearning module

Task *(What learners will be able to do)*

Condition *(When will they do this in the real world?)*

Standard *(How well ie if you were watching them perform this task, how would you know it was being done the way the organisation needed them to do it?)*

Step 3
Imagine The eLearning Scenario

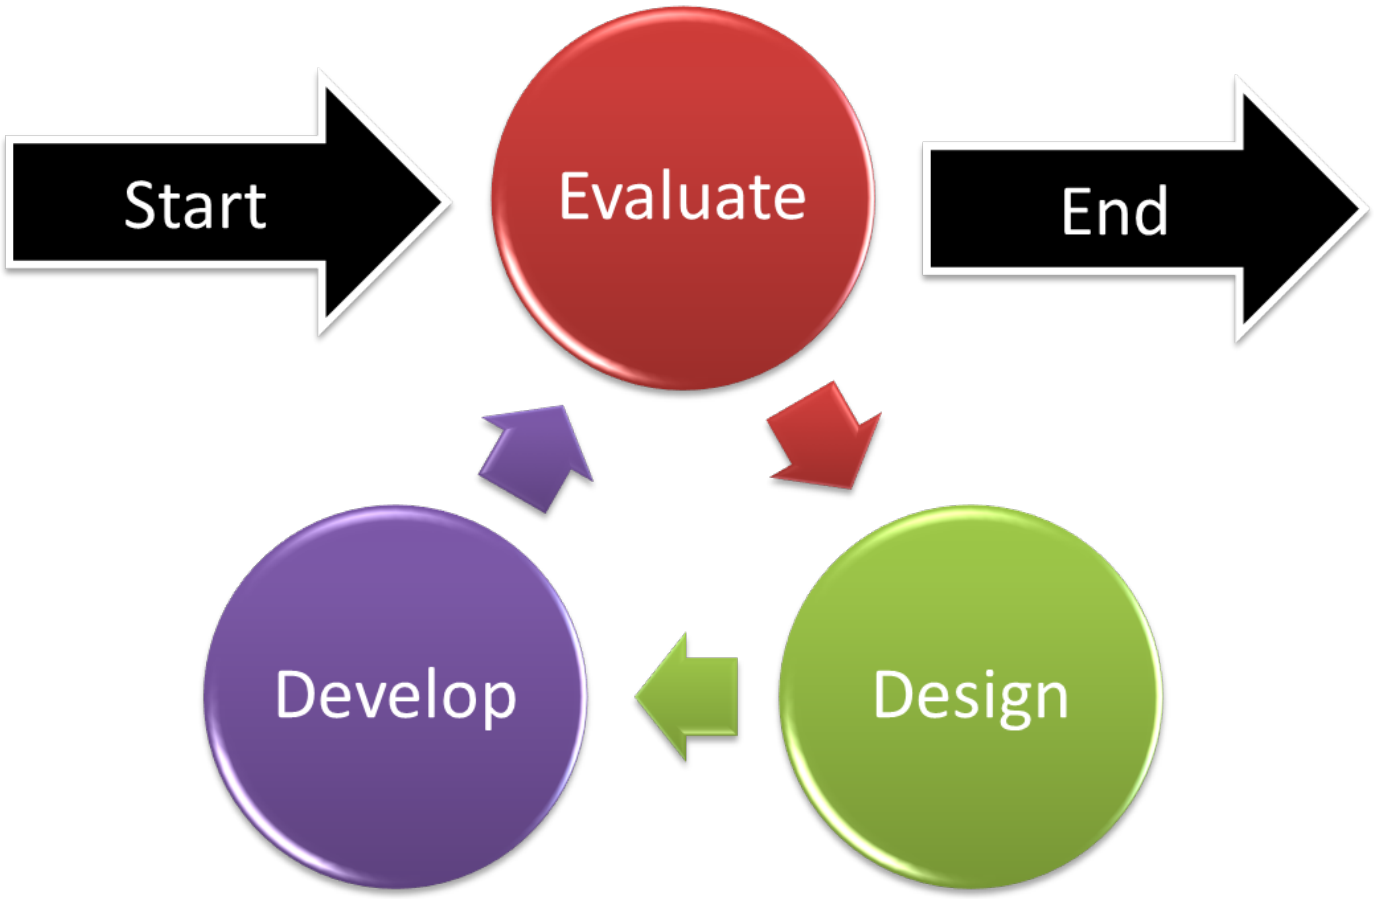
Contextual Challenge/Real Life Situation (Scenario)

Step 4
Create Your Storyboard

Task (Module Objective)	Activities	ABB Elements To Supply

Create Your Storyboard ctd

Step 5
Create The eLearning



Screen	Date	Signed
